Course #504

In-Use Off-Road Diesel Vehicle Regulation Training

The Air Resources Board has a new regulation to reduce emissions from existing off-road diesel vehicles used in California in construction, mining, and other industries. The In-Use Off-Road Diesel Vehicle Regulation will reduce the public's exposure to cancer-causing exhaust and other pollution from diesel vehicles. The regulation requires fleet owners to report to ARB and then to retrofit, repower, or replace their off-road diesel-fueled vehicles gradually over the next decade.

To assist fleet owners with their compliance efforts, ARB staff is conducting a series of training seminars on the regulation. These sessions provide an in-depth presentation of the regulation and how to comply, as well as information about grant opportunities. In addition, participants will have an opportunity to speak one-on-one with providers of exhaust retrofit devices. *This training will repeat the material covered in the first three rounds of training seminars conducted July 2008 through March 2009 and will also cover recent regulatory changes mandated by the State Legislature.*

July 28, 2009

1:00 pm - 4:00 pm

**South Coast AQMD,
21865 E Copley Dr
Diamond Bar, CA 91765
